Bellevue College

Sep. 2017 – June 2019

Running Start

Bellevue, Washington

Courses: Computer Programming I and II

WORK EXPERIENCE

International Wood Products

July 2022 – September 2022

Information Technology Intern

Clackamas, Oregon

Amazon Fresh

May 2021 – July 2022

Overnight Associate

Bellevue, Washington

- Worked closely with management to fix issues in tickets regarding proper implementation of Amazon's Just Walk Out technology at their flagship store.

Target Corporation

October 2020 – January 2021

Fulfillment Expert

Renton, Washington

Newport Hills Swim and Tennis Club

March 2018 – November 2020

Lifeguard

Bellevue, Washington

PROJECTS

Searchify | *React, Next.js, Flask*

March 2022 - August 2022

- Web app to visualize user Spotify data, albums, playlists, tracks, and artists through tables and graphics.
- Connects to a Flask API backend which uses Pandas and various libraries to manipulate data from Spotify, Spotify's python library for their API.

Mapping Terrorism | *Mapbox, JavaScript, Sass*

April 2022 - June 2022

- Web map built with the Mapbox JS library to visualize the data within the University of Maryland's Global Terrorism Dashboard.
- Implemented much of the HTML, sass stylesheet, and header page loader, as well as the map label and symbology for each individual point.
- Hosted on Github Pages using HTML, Sass, and Javascript.

United States Vacant Housing Analysis | *Jupyter, Python, ArcGIS, SPSS*

April 2022 - June 2022

- Worked with a team in partnership with the United States Department of Urban Housing and Development to update a typology on vacant housing in the United States based on an earlier report by Raven Molloy in 2016.
- Processed data from the USPS, American Community Survey, Census Bureau, and NHGIS using Pandas.
- Presented report and ArcGIS Story Map at the Geography Undergraduate Research Symposium.

RhodesAPI | *Typescript, Express, NodeJS*

June 2022

- Created a RESTFUL API deployed on Heroku for the mobile gacha tower defense game Arknights that supports GET, POST, and PUT endpoints.
- Made a web scraper using Cheerio and Playwright which stores the data in a MongoDB collection hosted on Atlas, cached with Redis.

Closure | *Typescript, NodeJS, Docker*

June 2022

- Created a Discord bot using Typescript and the Discord.js framework, hosted in a Docker container.
- Wrote a suite of scripts to scrape YouTube channels for their live status, independent of the official YouTube API.

TECHNICAL SKILLS

Languages: HTML, CSS, Javascript, Typescript, Python, R, SQL, Bash

Developer Tools: Windows, Linux (Mint, Debian Server), VS Code, Eclipse, Docker, Jest, Jupyter, Git

Technologies: PostgreSQL, MongoDB, Redis, Bootstrap, Sass, React, Svelte, Next.js, Vite, Express, NodeJS, Flask, Markdown, ArcGIS, QGIS
