October 2020 – January 2021

Fulfillment Expert

Renton, Washington

Newport Hills Swim and Tennis Club

March 2018 – November 2020

Lifeguard

Bellevue, Washington

PROJECTS

wesngu28.com | React, Next.js, Typescript, Mapbox, Tailwind

September 2022 - October 2022

- Personal website to showcase my projects and practice more React.
- Features custom scrollytelling and a detailed about me. Hosted on custom domain.

Observatory | React, Next.js, Typescript

October 2022

- Web app that is the interface for a CLI I made to read python and javascript dependency files.
- Displays a table of repositories not yet starred and allows the user to view information and star them.

Searchify | React, Next.js, Flask

March 2022 - August 2022

- Web app to visualize user Spotify data, albums, playlists, tracks, and artists through tables and graphics.
- Connects to a Flask API backend which uses Pandas and various libraries to manipulate data from Spotipy, Spotify's python library for their API.

Mapping Terrorism | Mapbox, JavaScript, Sass

April 2022 - June 2022

- Web map built with the Mapbox JS library to visualize the data within the University of Maryland's Global Terrorism Dashboard.
- Implemented much of the html and css, as well as the map label and symbology for each individual point.

United States Vacant Housing Analysis | Jupyter, Python, ArcGIS, SPSS

April 2022 - June 2022

• Worked with a team in partnership with the United States Department of Urban Housing and Development to update a typology on vacant housing in the United States based on an earlier report by Raven Molloy in 2016. Processed data from the USPS, American Community Survey, Census Bureau, and NHGIS using Pandas.

RhodesAPI and Closure | Typescript, Express, NodeJS, Docker

June 2029

- Created a RESTFUL API for the mobile gacha tower defense game Arknights that supports GET, POST, and PUT endpoints. Uses a web scraper which stores the data in a MongoDB collection hosted on Atlas, cached with Redis.
- Created a Discord bot to use this api using Typescript and Discord.js, hosted in a Docker container.
- Wrote a suite of scripts to scrape YouTube channels for their live status, independent of the official YouTube API.

$S{\scriptstyle KILLS}$

Languages: HTML, CSS, Javascript, Typescript, Python, R, SQL, Bash, Java, LaTeX

Tools: Windows, Linux (Debian, openSuse Tumbleweed), VS Code, Docker, Jest, Jupyter, Git
